

BIO-TACK DRG

BIO-TACK DRG is a biodegradable tacky rod grease. Composed of natural, non-toxic and environmentally friendly ingredients.

Application BIO-TACK DRG can be used in all drilling applications. BIO-TACK DRG provides lubrication and corrosion protection to the drill rod while not introducing harmful chemical into the environment.

- Advantages**
- Easily applied to the drill rod
 - Non-toxic
 - Environmentally friendly
 - Prevents corrosion
 - Reduces vibrations
 - Can be applied to wet and dry rods

Typical Usages

Typical Amounts of BIO-TACK DRG	
Drilling Application	
To improve lubricity and reduce rod vibration:	Apply BIO-TACK DRG to the exterior of drill pipe while tripping into the hole
In unstable hole conditions:	Apply ½ in. (12.7 mm) BIO-TACK DRG to the exterior of the drill pipe to further coat the well bore
Increase Yield Point	0.25 - 0.1 L

Properties

Physical Appearance	Brownish Yellow
Specific Gravity	0.9
pH	7

Packaging BIO-TACK DRG is packaged in 35lb buckets with 36 buckets/plt.
