

STAR-D-FOAM A

STAR-D-FOAM A is a alcohol-based anionic surfactant suspended in a mineral solvent. STAR-D-FOAM A is used as a wetting agent and defoamer.

Application STAR-D-FOAM A is used for both prevention and removal of foam caused by the addition of polymer. STAR-D-FOAM A can be added to mud pits or tanks to control foaming.

Advantages

- Easily mixes into the system
- Can be used for both prevention and defoaming applications
- Helps stabilize pump pressure by removing trapped air and gas
- Effective in saltwater

Typical Usages

Typical Amounts of STAR-D-FOAM A Added to freshwater	
Drilling Application	% by Volume
Treatment/Prevention	0.3 - 0.6
Saltwater Systems	0.75

Properties

Physical Appearance	Clear Liquid
Specific Gravity	0.85
Base	Alcohol

Packaging STAR-D-FOAM A comes in 20L (5gal) pails with 32 pails/pallet
