

STAR-D-FOAM G

STAR-D-FOAM G is glycol-based defoamer and wetting agent. It is suspended in a mineral solvent.

Application

STAR-D-FOAM G is used to control and eliminate foam caused by hydrocarbon release and polymer additions. STAR-D-FOAM G can be added directly to the tanks and mud pits to control foaming. The persistent nature of STAR-D-FOAM G allows it to inhibit further foaming.

Advantages

- Mixes easily and quickly
- Economical
- Effective in saltwater systems
- Helps stabilize pump pressure by removing trapped air and gas
- Low toxicity
- Persistent

Typical Usages

Typical Amounts of STAR-D-FOAM G Added to freshwater	
Drilling Application	% by Volume
Treatment/Prevention	0.15 - 0.3
Extreme Foaming	0.6

Properties

Physical Appearance	White liquid
Specific Gravity	1.031
Flash Point	>325°F (163°C) (PMCC)
Base	Glycol

Packaging

STAR-D-FOAM G comes in 20L (5 gal) pails with 32 pails/pallet
